

Audit Results

The Independent Forest Audits result in the production of a Final Report produced by the contracted audit firm. This final report is shared with the forest managers, Corporate MNR, the Forestry Futures Committee and the Minister of Natural Resources. The audit reports are tabled in the Legislature by the Minister. Once the reports have been tabled published copies of the reports are available to the public.

The following tables present the list of forests currently subject to audit and forest audit reports completed since the start of the audit program in 1996.
